#### LONDON STOCK EXCHANGE

# obl<sub>en</sub> Further losses in a nervous market

DOUBTS OVER the financial health of its own member firms returned yesterday to disturb a UK stock market aiready unsettled by concern over the outlook for sterling and for the British and US economies. Share prices gave further ground and only a few special deals enlivened a trading ses sion described by one leading trader as a non-event.

By late afternoon, securities business had virtually dried by Mr John Major, the chancel-up, leaving dealers with little lor of the exchequer. Some to do but to speculate on the implications of meetings believed to be under way at some leading market firms. The institutions appeared to have backed away from the

market ahead of tonight's speech in the City of London strategists suggested that the chancellor's speech, which is an annual tradition, might be used to disclose proposals for changes in government funding policies.

set in early in the day when Kleinwort Benson Securities, the London merchant bank, confirmed that it had placed its stake of nearly 138m shares in Premier Consolidated, taking a loss of around £34m on the stake, which has been hanging like a dark cloud over the market as well as over Kleinwort's fortunes. The disclosure shortly afterwards that a senior Kleinwort executive was leaving the group deepened dismay among market traders. Equities, which had opened lower after Wall Street's over-

night setback, extended their losses and the FT-SE Index was

soon down by more than 19

points. An attempted rally was then halted as signs that a market-making firm might be selling stocks brought a host of fears that all might not be well with the securities trading industry, and that another round of redundancies could be in the offing. Down went the Footsie index

again, with apprehension increasing ahead of Wall Street's opening for the new session. The second downturn of the day reached 22.6 Footsie points before Wall Street turned higher, showing a 17-point Dow gain in London time and inspiring a late rally in the UK.

At its final reading the

FT-SE Index was 15.6 down at 2,068.0, an uncomfortable reading for a market which had hoped that 2,100 might have proved a standing point. "Follow-through weakness could extend as far as 2,030," according to Mr Robin Aspinall at Hoare Govett. "But 1,880 remains the major target. Seaq volume jumped to 544.4m shares yesterday from 381.8m in the previous session. However, yesterday's total was boosted by the Premier deal, double-counted on Seaq. Since Premier is a market Beta stock, full details of the turnover will not be disclosed until publication this morning of the Stock Exchange Official List.

ouses were said to have

turned positive on the pros-pects for Burton. The shares

bucked the trend with a rise of

3 to 70p.

P&O fell steeply on widespread talk that its construction operations were in trouble
and that the company would
make a rights issue. P&O said

there was "absolutely no truth whatsoever" in these sugges-

tions and the shares recovered

from the day's low of 492p to close at 501p, still a net fall of 18. Turnover was 2.6m, busy for this thinly traded stock.

Tiphook managed to hold on

to all but 4 of Tuesday's jump of 21. The shares ended at 357p. This morning County NatWest

WoodMac issues a buy note on

the stock. The broker said that

financing ratios are "very sound", that the shares are

oversold and are among the

Another wave of apprehen-

sion hit Brent Walker late in the session, leaving the shares

a further 24 off at 60p. Analysts

suggested there was uncertainty over what the company could secure for the Goldcrest film-making arm. The market has been hoping Brent Walker might get £30m for the operation from its management but

tion from its management, but

analysts said the deal has been

talked of for 18 months and that, in general, banks were

unwilling to lend for manage-

ment buy-outs at the moment.

US buying of Maxwell Com-munication helped the shares buck the market trend with a

rise of 9 to 150p. Turnover was

#### **Premier** stake resolved

WEEKS OF uncertainty concerning Premier Consolidated Olifields, the oil group, and Kleinwort Benson, the merchant bank, came to an end yesterday as the bank, in conjunction with Cazenove, the stockbroker, placed the 29.7 per cent equity interest it bought in Premier early in August with a number of institutions. The stake, some 137.7m shares, was placed at 78p a share, according to Kleinwort Benson. Kleinwort bought the stake in Premier from Burmah Castrol on August 6, only days after the Iraqi invasion of Kuwait, which triggered an upward spiral in crude oil prices. Kleinwort was thought to have paid around 99p a share for the stake and attempted, unsuccessfully the same day, to place the shares at 103p aptece.

Premier shares, which have steadily declined since Klein-wort took on the stake, slipped back to 81%p yesterday before steadying and closing a net 4% down at 82%p, leaving Klein-wort with a loss, including the cost of financing the block of shares, of around £34m.

Oil specialists said the fail-ure of Kleinwort to place the stock earlier meant there was little or no chance of a bid materialising for Premier. "It was done at a hell of a discount to the original buying price and the ruling market price and it does not inspire confidence," said one analyst. Shares in the merchant bank, additionally upset by news of the resignation of Mr Charles Hue-Williams, manag-ing director of Kleinwort's securities division, fell to 277p lower on the day at 281p.

#### Highland fling Analysis welcomed Highland Distilleries move to take a 20

per cent stake in Orpar, the controlling shareholder in Remy Cointreau, of France, which makes and distributes cognac, champagne, liqueurs and wine. What particularly pleased

what particularly pleased the market was that part of the payment was in the form of Highland's 12.7 per cent hold-ing in Macallan-Glenlivst. Mr Geoff Collier at County NatWest WoodMac explained that Macallan shares traded on one of the highest price/earnings ratios in the market. Highland is best known for its Famous Grouse brand of whisky, and Mr Collies said the deal would strengthen the com-

Rémy Cointreau controls 51 per cent of Rémy Martin, in which Grand Metropolitan indirectly holds a 19.1 per cent stake. Until April GrandMet's holding was 49 per cent.

A rise yesterday for Grand-Met shares was attributed by traders to a stock shortage and a technical recovery following the previous day's fall on the publication by the Monopolies and Mergers Commission of conditions for the company's proposed pubs-for-breweries swap with Edgers IXI. Highland rose 9 to 212p, Macallan finished unchanged

at 553p and GrandMet improved 4 to 562p.

#### Water doubts

Fears that Severn Trent Water's bid for Caird Group may be in jeopardy caused the latter's shares to fall nearly 25 per cent in spite of Caird's recommendation of the water company's cash offer of 100p per share. Caird said it expec-ted profits for the 18 months to December 31 of 27.2m. But this was less than the figure set by Severn as a condition of its offer and also lower than the previous Caird forecast. Many analysts believed the bid would be withdrawn or that Severn Trent would submit a new lower offer. Dr

Edmund Bradley of Citicorp Investment Bank said another bidder was unlikely to appear, and which ever option Severn chose Caird would continue to drift lower. Caird finished 23 down at 70p, while Severn ended just 2 off at 194p. The weakness of the dollar hit some international stocks.

hit some invertisational socials.
Reuters lost 15 to 682p, BTR slipped 7 to 305p and Sotheby's fell 50 to 538p. Unilever shed 14 to 639p, additionally hurt by further consideration of Tuesdays decompositions. Hanson retreated 4% to 187% on consideration of the company's gold-for-timber assets swap with Sir James Goldsmith, announced on Theses Tuesday. Turnover was a hefty

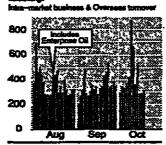

17m shares.

A New York recommendation insulated Rolls-Royce against the chill wind of the wider market. Ms Judith L Comeau of Goldman Sachs, the US investment house, said the stock has outperformed both the UK and US markets this year but its relative valuation is still low given the company's experience execution. is still low given the company superior earnings momentum.

Additionally, she continued, a prolonged conflict in the Gulf a prolonged conflict in the Gulf over of 4.1m, while NatWest

# FT-A Ali-Share Index 1150 1100 1050 1000 950

tary engine spares and for industrial engines in oil and gas exploration. Rolls-Royce shares edged forward before easing late to finish little changed on balance at 172p. After the close yesterday Cooper Rolls, a joint venture company, announced orders exceeding £60m for 14 gas turbine systems. The Rolls-Royce portion of the contract is worth over £20m. **VSEL Consortium** shares

suffered after the company amounced that it was seeking a buyer for the Cammell Laird subsidiary. The company said that now the Ministry of Defence has significantly reduced requirements for conventional submarines and surface vessels, it was impractical to contemplate more than two building yards being involved. in the current frigate programme. If a buyer can not be found

Cammell Laird will close down on completion of the current contract. Further short-term redundancies are inevitable in the meantime, continued VSEL. The shares settled at the day's low of 365p, down 22. Abbey National, hit in

recent days by hints that one of the top UK securities houses has been preparing a sell note on the shares, was easily the busiest stock in the banks arena. The shares fell 6% to 21% or turnover of 5 3m.

#### hardened to 257p on 1.5m. Prudential shares traded heavily - 9.6m changed hands as stories revived of the insurance group being ready to sell its Mercantile & General subsidiary. The rumours accompanied the suspension of trading of continental insurance group Axa-Midi; dealers said Axa was much more likely to make an acquisition in the US than the UK.

The recent new business figures continued to unsettle Legal & General, which fell 13 to 373p on good turnover of 3.8m shares.

ICI lost 9 to 813p after Nomura reduced its 1990 forecast to £1.05bn from £1.2bn and its 1991 estimate to £900m from £1.05bn. Nomura said the rise in oil prices had caused it to reduce its estimate. An average oil price of \$25 per barrel, compared with \$22, is expected next year. Also depressing ICI profits will be a firmer pound. British Telecom shed 6% to 264p on 7.8m, while the recent

profits downgrades and the prospects of more to come upset Racal Electronics, 4 off at 145p, and Racal Telecom, 9 down at 239p. Cable and Wireless moved up 6 to 421p after the Japanese joint venture news. STC rose 4 to 279p, still fuelled by bid speculation. The chief casualty of the motors sector was BBA. Two

investment houses lowered their profits expectations for both this year and next, caus-ing pressure which took the shares down 8 to a 1990 low of 110p. Analyst Mr Peter Cald-well said the BZW downgrade reflected "growing concern on European car markets into 1991". The stock is still not dear on the lower numbers but it is too early to buy, he added.

automotive component groups, also succumbed to worries about the European car mar-ket, which could provide the key to its short-term performance. First-half results were affected by the sharp downturn in both US and UK car production. GKN settled 3 off at 305p. Lucas Industries registered a couple of unusually large trades on the overnight ticker, and some traders became nervous awaiting Monday's pre-liminary statement. Dealers

said turnover yesterday was also well above normal, at 1.7m shares. Analysts' estimates of group annual profits range from around £180m to £195m. Some believe a continuing strong performance from aero-space activities will compensate for less favourable condi-tions in other markets. Lucas closed 4 easier at 112p. Geest rose 12 to 270p on spec-ulation that Albert Fisher and

not Geest was interested in bidding for Polly Peck's Del Monte fresh fruit division. Albert Fisher was unchanged at 110p.

TRADING VOLUME IN MAJOR STOCKS

Manpower, the employment agency formerly called Blue Arrow, eased 3 to 49p after the proposed buyer of its UK non-Manpower subsidiaries asked for the conditions of sale to be changed. Brook Opportunities "requested a variation of some of the terms (including a price reduction) to enable the purchase to take place; the terms and conditions of such variation are currently under discussion", said Manpower.

Beset by doubts over the final dividend, Trafalgar House shares drifted back further to close 7 lower at 188p. Cookson also turned easier after completion of an overnight tax loss deal involving 2.7m shares and

lost 2 to 68p.

Baris Holdings, on the other hand, furthered its response to

Tuesday's upbeat statement, gaining 3 for a two-day rise of 12 to 168p. Priest Marians rose 5 to 350 and Grovewood Securities

added a penny at 36p after the

boards of the two companies reached agreement on Grovewood's £4.94m bid. Easier crude oil prices and a generally unhappy equity market left the oils sector mainly

BP was marginally easier at 338p on turnover of 5.1m as the recent recommendation to have run its course for the time being. Shell, following a bout of profit taking, eased 5 to 447p on turnover of 2.4m. The oil price fall hit Enter-

prise, 12 lower at 638p on 1.4m, and Lasmo, 9 off at 439p. Ultra-

THE DOLLAR received some support from stronger than expected data on September US industrial production and capacity utilisation, but still fell to a record closing low against the D-Mark and to the lowest level for arms it mostly lowest level for over 21 months in terms of the Japanese yen.

Industrial production rose 0.2 per cent in September, after rising 0.1 per cent in August, while capacity utilisation was 83.6 per cent in September, unchanged from August. The market expected a fall of 0.2 per cent in production and a capacity utilisation figure of

about 82.8 per cent.
The US currency hit an all-time trading low of DM1.5040, but speculation about a fall below DM1.50 was not fulfilled after yesterday's economic news was slightly stronger than forecast. The eighth consecutive monthly decline in housing starts, of 0.6 per cent in September, left US building activity at its lowest level since August 1982, but had little affect on trading. The market now awaits today's fig-ures on US trade in August.
Profit-taking also lifted the
US unit off the day's lows. In
London the dollar finished at a record closing low of DML 5110, compared with DML 5155 previ-ously. At the Frankfurt fixing

**MONEY MARKETS** 

# lar was fixed at FFT5.0465. the lowest level since April 9, 1981, and finished in London at FFT5.0625 against FFT5.0750 on Tuesday. Against the Swiss franc the dollar fell to SFT1.2725 from SFT1.2785. Its index declined O.4 to 60.1. Sterling improved against the dollar and members of the European Monetary System.

at a record low of DM1.5068. It fell to Y125.20 from Y127.20

in London, the lowest close against the yen since early January 1989. In Paris the dol-lar was fixed at FFT5.0465, the

European Monetary System, but weakened against the Swiss franc and the strong yen. There was no important economic news but the market is likely to be nervous this morning ahead of today's UK employment data, amid fears employment data, and hears that the underlying rise in average earnings could be 10% per cent, compared with 10 per cent previously.

| Fire-Seco. Sterling also gained |
|---------------------------------|
| 80 points to \$1.9650, but      |
| declined to SFr2.5000 from      |
| SFr2.5025 and to Y246.00 from   |
| Y249.00. Its index closed       |
| unchanged at 95.0.              |
| In New York, sterling closed    |
| 30 points easier at \$1,9620.   |

#### Slightly softer tone THERE WAS a softer tone to wholesale interest rates in Lon-

wholesale interest rates in lon-don yesterday as sterling steaded on the foreign exchanges. Day-to-day credit conditions remained tight how-ever keeping short rates firm. The Bank of England forecast a large credit shortage, but did not offer early assistance, leav-ing overnight money well ing overnight money well above the current level of bank base rates.

#### UK clearing bank base lending rate 14 per cent from October 8, 1990

Three-month sterling interbank was quoted at 13%-13% per cent against 13%-13% and 12-month money

13%-13% and 12-month money eased to 13½-13 per cent from 13½-13 per cent from 13½-13 but overnight funds were firm at 1½½-1½ per cent before the daily help.

Short sterling futures traded quietly on Liffe, holding in a narrow band, as hopes of early cuts in bank base rates have faded. December delivery opened higher at 86.73 and closed at 86.59 compared with 86.71 previously.

86.71 previously.
The Bank of England rne Bank of England initially forecast a money market shortage of \$200m, but revised this to £1,000m at noon and to £950m in the afternoon. and to ESSUM in the attention.

Total help of £842m was provided. Before lunch the authorities bought £352m hills

The same process to the contract of the contra

by way of £15m Treasury bills in band 1 at 13% per cent; £30m bank bills in band 1 at 13% per cent; £9m Treasury bills in hand 2 at 13% per cent; £10m local authority bills in band 2 at 13% per cent; and £288m bank bills in band 2 at 13% per cent.

Yes per 1,000: French Fr. per 10: Ura per 1,000: Beigian Fr. per 100.

In the afternoon another £250m bills were purchased, via £36m bank bills in band 1 at 13% per cent; £3m Treasury bills in band 2 at 13% per cent; and £15im bank bills in band 2 at 13% per cent. Late assistance of around £240m was also provided.

Bills maturing in official hands, repayment of late assistance and a take-up of Treasury bills drained \$752m. with exchequer transactions absorbing £10m; a rise in the note circulation £70m; and bank balances below target

In Paris the Bank of France left its money market intervention rate at 9.50 per intervention rate at 9.50 per cent when injecting funds at a securities repurchase tender. The five to 10-day repurchase rate stayed at 10.25 per cent. In Frankfurt call money was steady at 8.05 per cent after the Bundesbank allocated a total of DM24.1bn at this week's securities repurchase agreement tender. The central bank supplied DM15.9bn of 28-day funds and 8.2bn of 63-day money to offset expiring pacts of DM22.3bn.

The second secon

# Lower oil prices offset several depressing factors

CONCERN about the progress of the budget, the Middle East crisis and declining corporate results offset the positive effect of lower oil prices to leave equities trading in a mixed

range yesterday, writes Karen Zagor in New York. The Dow Jones Industrial Average ended 6.68 up at 2,387.87, after gaining more than 24 points at mid-session. However, the overall tone of the market was negative, with the Standard & Poor's 500 los-ing 0.17 to 288, while on the big board declining issues led rises by 832 to 658. On Tuesday the

Dow fell 35 points.
Equities took strength as
November crude oil was
quoted \$2.17 a barrel lower at
\$36.57 at mid-session — rising
oil prices contributed to Tuesday's market decline day's market decline.

Stock prices were also helped by a 0.2 per cent increase in industrial production in September, which follows a 0.1 new cent increase. lows a 0.1 per cent improve-ment in August and indicates that the economy may not be as soft as previously thought. However, lower earnings prompted selling in a number of issues. Student Loan Mar-keting Association (Sallie Mae) fell \$2% to \$35% in active trad-ing. It dropped \$6% late on Tuesday on reports that Fed-eral officials have started

Lawrence, Kansas, office to see if it had bought worthless loans to inflate assets and boost the company's stock price. Sallie Mae has denied

the allegations.
In the banking sector, Citi-corp eased \$% to \$12% in heavy volume following weak first-quarter results. NCNB, the south-eastern US

regional banking group, declined \$1 to \$20% after reporting a drop of about 60 per cent in third-quarter earnings. Fleet/Norstar Financial, the north-eastern regional banking group, lost \$% to \$10% on equally depressed

results.
First City Banc of Texas plunged \$2% to \$5% after announcing third-quarter losses of \$5.87 a share, compared with earnings of \$1.19 the previous year, and Continental Bank dipped \$% to \$7% on lower third-quarter net income. PensiCo receded \$1 % to \$22%

on reports that its stock rating had been downgraded by Salomon Brothers. Coca-Cola, which reported a rise in third-quarter net income, softened \$24 to \$41%. Philip Morris gained \$% to \$45 on a 24.7 per cent rise in third-quarter per share earn-

ings.
Shaw Industries, which also revealed a decline in first-quar-

in the company rose \$% to \$11% on Monday when Itel said it would sell its multi-purpose container leasing and services assets to a General Elec-

Secondary issues moved higher thanks to a rebound in technology shares, which led the decline in over-the-counter stocks on Tuesday. The NAS-DAQ composite was 1.34 higher

Apple Computer recouped some of Tuesday's losses to close \$1½ better at \$26½. Microsoft regained Tuesday's fall of \$1% to stand at \$56% Quantum moved shead \$1% to \$14% after NCR selected the company's hard disk drives to use in its personal computers. MCI lost \$1% to \$29% on weak third-quarter results.

A RALLY in the golds sector helped the Toronto composite index to improve 13.5 to 3,023.4 breaking a string of nine con-

secutive losses.

Eight of the 14 sub-indices rose, but overall falls outscored advances by 317 to 240 after a moderate volume of 21.8m shares, against Tuesday's 24.3m. Energy issues eased. Canadian Pacific Forest was up C\$% to C\$14% and MacMillan Bloedel rose C\$% to C\$14%

in spite of poor third-quarter

ter earnings, rose \$1/4 to \$161/4.

# Activity dries up as Gulf tensions increase

Peter John explains the sudden decline in European trading volumes last month

HE TWIN headlights of oil prices and Gulf ten-sion have caught Europe's stock markets like startled rabbits, freezing them September, volume in Germany was the lowest since May 1989 and in Italy it nearly halved from the August level.
The share price slump began
in August, but its effect on
trading was masked in that month, as the invasion of Kuwait prompted a rash of heavy selling by institutional investors, who saw cash as their main safe haven.

September saw the full effect of the crisis, poor company results and prospects, and war-ries about economic recession, with equity volume down In the first half of the month

S E Turnover (DMbn)

beginning of last month and crept up towards the end. The worst performance came from Raly, where September's furnover of L10,645pn was down by almost 50 per cent from the August level. The Milan equity market feit a greater than average impact because Italy imports a higher

It is also more vulnerable to high interest rates because of a big budget deficit.

Analysts say that unless the government does something about the deficit, which will anour the tental, which in the form of hindget cuts and unemployment, the amount paid to service the debt will continue

to rise.
Italian investors have moved from scepticism to disbelief, but strategists say that it is too early to predict the end of the Italian economic miracle, which manages to trundle on in spite of ever present rumours of crists.

Mr Enrico Ponzone of Klein-wort Benson, the UK merchant bank, says: People do not know what to do. There are no buyers so the sellers are scared off. The budget deficit and political uncertainty are adding to worries over the Gulf and oil. When the market lacks direction it tends to blow the domestic issues out of all pro-portion." He concludes: "However, I do not think the volume

# Nikkei gains for third day on strong yen and bonds

THE YEN's rise and higher index to make its third consecmoex to make he thru consecutive gain yesterday, breaching the 24,000 level at one stage, writes Michiyo Nakamoto in Tokyo.

Yesterday's advance marked the first three-day rising streak for the market in three months. The Nikkei average closed up 253.26, or 1.1 per cent, at 23,859.36. Prices started higher but

fluctuated in early trading as profit-taking hit the market. Active arbitrage between the cash market and the higher futures market, however, helped shares regain their upward momentum. Solid gains in intraday trad-

reach a high for the day of 24,053.94 — the first time in a month that it has broken through 24,000. The day's low

Advances outpaced falls by 628 to 356 and 129 issues were unchanged. Volume expanded to 600m shares from Tuesday's 500m. The Topix index rose 21.65 to 1,758.34, but in London the ISE/Nikkei 50 index shed

6.73 to 1,57.85.

The market's resilience came as a pleasant surprise to still cautious participants. Mr Mitsuru .Maekawa at Jardine Fleming said: "The fall was unexpectedly strong, so it is not surprising that the rise has en unexpectedly firm. But it questionable whether we can hope for a full-scale rebound." While the yen's surge has een a boon to the bond market, helping to spread the view that domestic interest rates have peaked, few analysts were betting on a significant fall in domestic rates in the near
